

## Senior Project Manager – Commerce Payments

We are looking for experienced Senior Project Manager that can plan and coordinate all aspects of projects from initiation to delivery.

Candidate will be an integral part of planning and delivering a "best-in-class" commerce system or solution for our enterprise clients.

### Responsibilities

- Develop, define and execute project plans, project scope, activities, and deliverables
- Identifies needed resources for projects, defines and assigns resources
- Possesses thorough understanding of estimates, agreements, bill rates, cost structures, and staffing models
- Oversees schedules and budgets to ensure goal attainment
- Manages project risks, issues, and activity progress communication
- Communicates clearly and effectively at all stages of a project to a multitude of client stakeholders, client team members, and consulting team
- Manages all five stages of projects, including final project completion and client sign-off

### Requirements

- Proven experience as a Senior Projects Manager, preferably having managed multiple smaller projects in parallel with varying team members on each project
- Extensive knowledge of project management standards, industry best practices
- Familiar with the various types of IT project methodologies, capable of quick transition between parallel projects
- Excellent knowledge of software development project methods
- Outstanding communication Skills
- Great attention to detail
- BS or Advanced Degree
